Laurie,
Would you print it.
Thanks,
Joanna

We are jetting and cleaning about 1900 LF of 24" and 15" storm drain pipe. We will then be decommissioning the pipes by plugging and sealing the pipes at the 7 manholes on Jorgensen's property.

Mike,

PW needs some clarification too. On page 2 of your permit application under scope of work it reads: **plugging & sealing 24" storm drainage at public MH**; however there is no mention of work on the private property. Please provide us with a short narrative of what will be done on private property, so PW can modify proposed project scope.

If the permit covers work on the private property as well, than the permit fee is calculated based on the total project cost.
Is the \$148,237.00 a lump sum bid or you can provide us with an itemized bid.

I need some clarification on what dollar amount the cost of the permit is going to be calculated on. Joanna called today and the permit was going to be \$6000 (not the exact amount) which is based on the total cost of the project. I thought it was determined that the cost of the permit was going to be calculated on the dollar amount of the work being done in the public right of way which is \$3000.

We are scheduled to plug the public manhole tomorrow. Please let me know asap how the cost is going to be determined and what the amount will be.

Hi Joanna

I submitted a application for a permit a couple of weeks ago. Here is some additional information you needed to complete the permitting process.

The cost will be approximately \$3,000 to plug the public manhole. This includes grout or blow-up plugs and shoring to facilitate the cleaning of the pipe systems, then CDF backfill the manhole.

I will be coming to the permitting office this morning.

Thanks

Mike Pearia
